

NQ Dry Tropics invites you to learn how to....

# Take control of invasive weeds

Grader grass is one of many invasive weeds that can quickly take control, producing devastating effects on properties.

## **Invasive Weeds Workshop**

**Sunday 25 September  
9.30am - 1.30pm  
189 Chisholm Trail,  
Oak Valley**

### **Weed Hygiene**

Learn how to stop these invasive pests from spreading.

### **Seed Dispersal**

Each weed is different and has a different dispersal method. We'll cover three chosen weeds - Snake Vine, Grader Grass, Chinee Apple. You'll also learn how to identify Siam.

### **Chemical Safety**

Learn how to safely mix chemicals, use spray units and pull weeds.

### **Mechanical Demonstrations**

Watch a practical demonstration of a precision mulcher which is ideal for mechanically controlling Chinee Apple

### **A light BBQ lunch will also be provided**

This is a free workshop proudly brought to you by NQ Dry Tropics with support from the Australian Government's Caring for our Country initiative.
